

# Our School

## A TWINS PROGRAM GUIDE

### **Aim:**

This project aims to provide students with an opportunity to share information about their school community with their Twin School abroad.

### **General Overview:**

This project is a great way for two Twin Schools to introduce themselves to each other and is very useful as a first project to share between Twins.

A selected group of students from each Twin School creates a series of posters about their school. These posters can include illustrations, photographs and interesting facts about the school community.

These 'My School' posters will then be mailed to the overseas Twin school.

Once both schools have completed their posters they post them to each other to be displayed at their Twin School.

It is an excellent way for the schools to introduce their school and wider community to their Twin!

### **The posters can include information about:**

- **School Grounds**
- **Subjects**
- **School Statistics**
- **History of School**
- **Sports and Extra Curricular Activities**
- **School/Student Achievements**
- **Interesting Facts**
- **Local Community**
- **Example school work**
